

Julian Nicácio Garin Brandalise

Technical Team Lead · Prompt Engineer · Blockchain Developer

📍 Remote | 🌐 LinkedIn: linkedin.com/in/juliannic | 💻 GitHub: github.com/juliannic | ✉️ jngbrandalise@live.com

Profile

I build things that connect AI, blockchain, and people. For the past 7+ years, I've been leading global teams and coding products that make crypto more usable from DeFi protocols and NFT platforms to automation pipelines powered by AI. I'm fluent in Solidity, strategy, and storytelling. I turn complex tech into systems people actually want to use. My background mixes hands-on engineering, product thinking, and leadership, usually remote, always fast-paced. Currently focused on bridging AI agents with decentralized infrastructure because the next wave of the internet should be trustless and intelligent.

Core Strengths

- Leadership & Management: Remote team leadership · Agile (Scrum, Jira, Confluence) · Mentoring · Cross-functional collaboration · Process optimization
- Blockchain Engineering: Smart contracts (Solidity, ERC-20/721/1155) · Layer-2 scaling · DeFi integrations · NFT platforms · Security audits
- AI & Automation: Prompt engineering (CoT, ReAct, role/system prompting) · LangChain · OpenAI / Gemini / Claude · Automated pipelines for documentation, content, and code
- SEO & GEO Strategy: AI-driven keyword architecture, content automation, analytics dashboards for regional audience growth
- Tech Stack: Solidity · TypeScript · Node.js · Python · React.js · Ethers.js · Web3.js · Docker/Kubernetes · AWS/GCP
- Languages: German (native) · English (fluent) · Portuguese (fluent)

Professional Experience

BeInCrypto DE – Crypto News

Local Team Lead (DE) | Prompt Engineer | AI Automation Lead — Oct 2022 – Present · Remote

Lead the strategic and technical growth of BeInCrypto's German market, uniting blockchain expertise, AI automation, and data-driven SEO/GEO frameworks.

- Designed AI-powered content pipelines (summarization, translation, generation) — reducing manual workload by 40%.
- Built and trained prompt engineering systems to enhance editorial consistency and localization

accuracy.

- Developed advanced SEO + GEO models for regional crypto markets, driving measurable audience expansion.
- Directed a cross-disciplinary remote team (writers, developers, analysts) to align product, data, and editorial goals.
- Led automation initiatives for analytics and code documentation, integrating LangChain and OpenAI APIs.

Bitcypher (Switzerland)

Solidity Developer — 2020 – 2021 · Remote

- Developed and deployed Ethereum smart contracts for a decentralized data marketplace.
- Created blockchain data scrapers and APIs in Python and Node.js for real-time data analysis.
- Set up CI/CD pipelines and automated testing environments for high-reliability releases.

PixelKings.io (Brazil)

Smart Contract Developer — 2019 – 2020 · Remote

- Built NFT minting and trading contracts using Solidity + Web3.js with IPFS integration.
- Conducted security audits preventing exploit vulnerabilities pre-launch.
- Collaborated with frontend developers to implement smart contract-connected UIs.

Verum Capital (Switzerland)

Blockchain Developer — 2017 – 2020 · Remote

- Developed multi-sig wallets, DAO governance, and token sale contracts for enterprise clients.
- Delivered CharityDAO, a transparent donation platform for Ukraine relief.
- Mentored junior Solidity engineers, building internal development standards.

Metapoly (China)

Team Lead — 2016 – 2017 · Remote

- Managed Agile squads with Jira/Trello, introducing Scrum methodologies that improved sprint velocity by 25%.
- Coordinated cross-continental product releases across blockchain, DeFi, and gaming teams.

Key Projects

- DeFi Lending Protocol: Staking and yield farming with automated reward balancing.
- Real-Estate NFT Marketplace: Asset tokenization on OpenSea.
- Carbon Credit Platform: Tokenized carbon offset trading on Ethereum.
- Multi-Chain NFT Aggregator: Seamless cross-chain asset discovery and exchange.
- Decentralized Identity System: On-chain verification for user authentication.

Education

- B.A. in Business Administration – Universidade de Caxias do Sul, Brazil (2015)
- Business Administration with Legal Focus – Carl von Ossietzky Universität Oldenburg, Germany (2009)

Certifications

- Certified Solidity Developer – ConsenSys Academy (2020)
- AWS Certified Solutions Architect – Amazon Web Services (2022)
